 Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Becker (6,070,506) in view of Gitis et al.

Regarding claim 3, Becker discloses a ratchet head electronic torque wrench comprising a main body 11 and a strain gauge 45, 47 mounted in the main body, the main body being hollow and including a handle portion 29 and a drive portion 28 located at a distal end of the handle portion, and the hollow interior being extended through the handle portion 29 and the drive portion 28 and a whole length of the handle portion and the drive portion and the strain gauges 45, 47 being within the hollow interior (See Col. 3, lines 1 – 43, See Figs. 1 and 3) but does not disclose that two ends of the opening are expanded to have larger areas than another portion of the opening. However, Gitis et al disclose a method and device for measuring forces comprising a beam structure 212 wherein ends (222, 224, 226, 228) of openings 218, 220 are expanded to have larger areas than the other portion of the opening (See Col. 3, lines 30 – 40).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Becker according to the teachings of Gitis et al for the purpose of,

Art Unit: 2855

providing an assembly of two deformation sensitive sensors for simultaneous equal deformation in two opposite directions for eliminating misbalance created in the measurement system and transmitting forces between a plurality of plates while ensuring limited freedom of movement between the plates to allow deformations caused by the applied forces (See Gitis et al, Col. 2, lines 49 – 67).

Response to Arguments

3. Applicant's arguments with respect to these claims have been considered but are moot in view of the new grounds of rejection.

Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
